SUMMARY

I am a passionate and motivated **Software Developer (Fresher)** with practical experience in building **responsive websites** and **Java console applications**. I have good knowledge of **Java, JavaScript, HTML, CSS, and Bootstrap**. I understand **OOPs concepts** like Encapsulation, Inheritance, Polymorphism, and Abstraction. I enjoy writing clean and simple code. I am also learning new technologies to become a **Full Stack Developer**. I'm eager to work on real projects and grow as a developer in a team environment.

EDUCATION

Alagappa university, Karaikudi, India - <i>Bachelor, Computer Science 72%</i>	2021 — 2024
Govt. Boys higher secondary school, Singampunari, India - <i>High school 70%, HSC</i>	2019 — 2021
Govt. Boys higher secondary school, Singampunari, India - <i>High school 65%, SSLC</i>	2017 — 2019

PROJECTS

Shopping Cart Link:	May 2025 — Jun 2025
--	----------------------------

- Tech Stack: HTML, CSS, Bootstrap, JavaScript:

Developed a fully responsive e-commerce website using HTML, CSS, Bootstrap, and JavaScript. Implemented user authentication system with login and registration forms using JavaScript validation. Created dynamic product listings with real-time search and category filtering. Designed and developed a shopping cart with “Add to Cart” and “Buy Now” functionality using JavaScript. Ensured smooth user interaction with form validation, interactive UI elements, and client-side logic. Used Bootstrap components to maintain a consistent and mobile-friendly design. Applied modular JavaScript to manage cart storage, quantity updates, and local/session storage.

Tic Tac Toe Game (Java Console Application):	Jun 2025 — Jun 2025
---	----------------------------

- Developed a fully functional Tic Tac Toe game in Java with two playable modes:

Player vs Player: Two human players take turns.

Player vs Computer: The player competes against a computer making random valid moves.

3x3 board with real-time display and move updates.

Input validation for player moves.

Turn-based logic with automatic switching.

Win condition checks for rows, columns, and diagonals. Draw condition check when the board is full.

Random move generator for the computer opponent.

Modular code using separate classes for Game, Board, and Player.

SKILLS

Programming Languages : Core Java, JavaScript, Spring Boot

Database Management : SQL

Web Development : HTML, CSS, Bootstrap, React

Tools : Eclipse, Visual Studio, Git, GitHub, PostgreSQL
